REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-17 and 55-81 are allowable over the prior art of record.

The Examiner has found that the prior art of record does not appear to teach or suggest or render obvious the claimed limitations in combination with the specific added limitations as recited in independent claims and subsequent dependent claims.

One such prior art of record is a U.S. Patent 6,487,538 to Gupta et. al. teaches an embodiment that provides for an ISP to collect and store demographic information such as the user's age, residence, credit history, etc. Additionally, stored information may include web sites the user has accessed, time spent on each web site, and any searches performed by the user. The profile information may be utilized by the proxy to conduct targeted advertising and to associate a cost with certain demographic information. The profile information may be evaluated by the ISP for advertisement insertion. Alternatively, the profile information may be forwarded to an advertiser or advertising agency that evaluates and forwards back an advertisement for the proxy to transmit to the user.

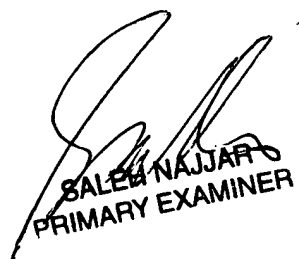

However, the prior art of record does not teach a system using predefined parsing information as part of the analysis for analyzing web site navigation interaction data, the predefined parsing information including information indicating occurrence times for which the predefined parsing information is effective. This information can be stored in log files and supplemented with data from other sources, of customer data in order to identify various occurrences of interest corresponding to defined category types. When analyzing a customer's web site interaction data, the parser component can use data defining customer specific categories of web pages. Said high-level types of occurrences can be specified in a variety of ways, such as by using a combination of
